## Congratulations

Visit [iopscience.org](http://iopscience.org) [Read this e-mail online](#) [Add us to your safe sender list](#)

Dear Dr Matos,

We are delighted to announce that you are one of our Outstanding Reviewer Award winners for 2017, in recognition of the high quality and timeliness of your reviews for Classical and Quantum Gravity. Without your input and expertise, it would be impossible to maintain the high standards of the journal, and we would like to thank you very much for your contribution. This award is given to a very small number of reviewers who are judged by our editorial teams to have provided exceptional service to the journal during the year.

[You can download a digital badge here](#) which you can use on your CV or webpage, and you can also [download your certificate here](#).

We would like to list all winners on our [website](#), but understand you may not wish to be identified in this way. Please let us know if you would rather not have your name displayed, or if there are any corrections to be made to your listing, which we have on file as **Dr Tonatiuh Matos, Centro de Investigacion y de Estudios Avanzados del IPN**.

Reviewers play a vital role in scholarly publishing, helping to improve and highlight the most important work in their field. We want to recognise and reward these contributions, so we are not only acknowledging our best reviewers (like you!), but we are also helping all reviewers to track, verify and showcase their peer review contributions through our partnership with Publons. As a result of this partnership, reviewers can seamlessly have their reviewer records updated in Publons with the click of a button. By default, only the name of the journal and the year of the review will be displayed, so your anonymity is completely protected. To find out more about Publons and join over 280,000 other experts committed to recognising peer review, visit: [publons.com/in/iop/](http://publons.com/in/iop/).

We are really grateful for your contribution. Thank you so much for your time. We look forward to working with you on Classical and Quantum Gravity in 2018!

Best regards,

Kim Eggleton  
Senior Managing Editor
