**Asunto:** Re: **Special Issue on Wave Descriptions of Dark Matter in the Universe**

Dear Dr. Matos,

I am pleased to let you know that your Special Issue proposal titled "Wave Descriptions of Dark Matter in the Universe" has been approved by the Editorial Board of Advances in Astronomy. I am attaching the comments of the Editorial Board members to have a look at them.

Regarding the timeline of the Special Issue, I suggest to postpone the submission deadline to December 2, 2011 to give submitting authors enough time to prepare their articles and to give our Marketing Team enough time to promote the issue. So, we simply could change the schedule to be as follows:

Manuscript Due: December 2, 2011  
First Round of Reviews: March 2, 2012  
Publication date: June 1, 2012

Please have a look at the updated version and let me know if you have any updates to be added to the Call-for-Papers, otherwise, we will go ahead and publish the Call-for-Papers online within a few days.

Best regards,  
Olla

Dear Olla Galal,

we want to add two topics to the call for papers if possible. I send you it with the small modification.

If it is possible, please comment to the Editorial Board members that this topic will be important in the future if the LHC does not find the dark matter particle soon. So far, non detector has seen such particle after 20 years observation. The alternative we are trying to review in this issue is real and high possible.

Dear Dr. Matos,

I was wondering if your Guest Editor has sent you his biography since we need to proceed with forwarding the proposal to the Editorial Board of the journal for their review.

Best regards,  
Olla

Dear Dr. Matos,

My name is Olla Galal and I am the Special Issue Developer currently in charge of Advances in Astronomy. I am glad to receive your tentative Call-for-Papers. Please

note that the Call-for-Papers should consist of a title, Aims and Scope of the Special Issue, list of topics, timeline, and list of Guest Editorial Team. So, you need to enumerate some potential topics in the proposal.

In addition, I suggest to postpone the submission deadline to November 15, 2011 to give submitting authors enough time to prepare their articles and to give our Marketing Team enough time to promote the issue. So, we simply could change the schedule to be as follows:

Manuscript Due: November 15, 2011  
First Round of Reviews: February 15, 2012  
Publication date: May 15, 2012

Finally, I would appreciate if you can send me a one-paragraph biography for yourself and for Dr. Nuñez.

I look forward to hearing back from you.

Best regards,  
Olla

From: Tonatiuh Matos<tona.1971@gmail.com>  
To: Ahmed Gado<ahmed.gado@hindawi.com>

Dear Ahmed Gado,

enclose please find the call for papers for the Special Issue on Scalar Fields in the Universe, we have change the name to Wave Descriptions of Dark Matter in the Universe. We are very sorry for the delay, but we established a great discussion about the topics, the name and the people we can invite for the special issue in order to have something complete and of high quality. At the end we conclude that the name "Wave Descriptions of Dark Matter in the Universe" is much more convenient and general for the special issue.

Please let us know if everything is ok, if this is the case we have in mine to invite some people that can give the issue a very high quality.

Best Regards,

Tonatiuh Matos
