## SCON Astro Physics 2019:

The Congress is intended to bring together leading Astrophysicists, academics and scientists in the field of Astro Physics and Particle Physics, to exchange and share relevant experiences in their practice. This would centre on presentations and discussions on research results on all aspects of Astronomy and Particle Physics. It will also provide a platform for interdisciplinary researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns in their research efforts. Finally, the Congress will afford participants the time to disclose practical challenges they encountered, as well as the solutions they discovered in their field investigations in Astronomy.

The theme of the conference is **Collaborating Particle Physics and Astrophysics Concepts Toward Understanding the Mechanism of Universe.**

**Scope of SCON Astro Physics- 2019:** The congress would involve eminent clinicians, scientists and students of Astro Physics. Consequently, it will provide the necessary platform to both transfer and exchange relevant knowledge in the field of Astro Physics and Particle Physics. The speakers and delegates come from the academia, industries, and private and government laboratories across the world.

### Program Schedule
